ABOUT CGC
Established with the vision to be the most preferred educational group with global recognition, Chandigarh Group of Colleges has become one of the leading Educational Group of the country. Chandigarh Group of Colleges started its first Campus at Landran in the year 2001, and has dynamically evolved in a healthy challenging environment within state of art campuses. Guided by a set of faculty who are alumni of IIT’s and other top Institutions of the country, CGC has come to lead others with unique teaching methods, path breaking researches and quality placements.

ABOUT CONFERENCE
2nd International Conference on Innovations in Computing (ICIC 2018) is an international forum for researchers, engineers, academicians as well as industrial professionals from all over the world to share and publicize their research work and development activities in the field of Cloud Computing. This conference provides opportunities to our university students to interact with the external researchers and delegates to exchange new ideas and application experiences face to face, also helps the university to find global partners for establishing educational and research relations and for future collaboration. The conference holistically aims to promote translation of basic research into applied investigation and convert applied investigation into practice. This conference will also create awareness about the importance of basic scientific research in related fields and synchronizing with product market.

OBJECTIVES OF CONFERENCE
• The conference is anticipated to attract a large number of high quality submissions and stimulate the cutting-edge research discussions among many academic pioneering researchers, scientists, industrial engineers, Security Experts, students from all around the world and provide a forum to researcher.
• Propose new technologies, share their experiences and discuss future solutions for Intelligent Systems for Countries.
• Provide common platform for academic pioneering researchers, scientists, engineers, Security professionals and students to share their views and achievements.
• Enrich technocrats, professionals and academicians by presenting their innovative and constructive ideas.
• Focus on innovative issues at international level by bringing together the experts from different countries.

TECHNICAL TRACKS
ICIC 2018 welcome original and innovative paper submissions from the academia, industry and government, describing theoretical advances, system design, implementation and experimentation on the following topics, but not limited to:
• Mobile, peer-to-peer and pervasive computing.
• Ubiquitous communications and networks.
• Sensor, ad hoc networks, mobile agents and networking.
• Multimedia communications, machine to machine communications.
• Multi-core systems, parallel and distributed systems.
• Internet-of-Things and cyber systems.
• Green Computing
• Grid computing
• Peer-to-peer social networks
• Soft Computing: Fuzzy and Neural Network Systems
• E-Learning, e-Commerce, e-Business and e-Government
• Database Systems
• Digital Image/Video Processing
• Data and Network mining
• Artificial Intelligence and Decision Support Systems
• Cloud Computing & Big Data Analytics
